The surface showings of FREE GOLD are said to be the most remarkable that have been seen in this state, and the characteristics of the ground, as well as the development this far, indicate the presence of a large ore body.

A prospect tunnel crosscuts the ore body at a depth of about 50 feet, encountering ore at 60 feet, and the fact is still in ore at 135 feet. Assays from a streak in this tunnel give values of

\$51,000.00 PER TON

A second prospect tunnel now being run with all possible speed is in 240 feet and is expected at any time to cut this one body at a depth of about 150 feet. Should this expectation be realized any time to cut this one body at a depth of about 150 feet. Should this expectation be realized any time to cut his one body at a depth of about 150 feet.
